

AHK INDIEN TRAINING

Fundamentals of Carbon Accounting and CBAM

Preparing for the Carbon Border Adjustment Mechanism

As nations work towards reducing greenhouse gas (GHG) emissions, domestic and international policies are reshaping how businesses approach their sustainability footprint. The **EU Carbon Border Adjustment Mechanism (CBAM)** requires companies to account for the embedded emissions of products imported into the EU, **creating a growing need for carbon accounting across global supply chains**. For companies looking to strengthen their position in the European market, understanding these evolving requirements and the sustainability expectations of international business partners is becoming increasingly important.

Join the Indo-German Chamber of Commerce for the 2-part **Virtual Training on 'Fundamentals of Carbon Accounting and CBAM'** to build your knowledge and take the first step towards carbon management.

This training provides professionals with a **foundational understanding of carbon accounting principles, methodologies and the EU CBAM framework, helping them better understand the role of emissions measurement in international business and prepare for evolving market expectations**. The training combines German training and pedagogical standards with a curriculum adapted to the Indian business environment to help participants build the knowledge needed to better understand and engage more effectively with emerging carbon management requirements.

Details

Format	**Virtual**
Duration	**8 learning hours (2 x 3-hour sessions + 2 hours self-study)**
Instruction Method	**Interactive format with group exercises**
Certification	**IGCC Certificate of Participation**
Course Fee	**IGCC Members:** **INR 18,900** (+18% GST)* **Non-Members:** **INR 22,900** (+18% GST)*

**10% reduction on multiple registrants from a company*

Benefits

- ✓ Understand the **fundamentals of carbon accounting**, including key concepts, principles and methodologies in line with the GHG Protocol.
- ✓ Understand organisational & product-level carbon footprinting.
- ✓ Understand the **EU CBAM framework**, its scope, applicability and implications for Indian manufacturers and exporters.
- ✓ Build awareness of evolving international requirements and buyer expectations relating to product carbon emissions and reporting.

Who should apply?

The training is designed for professionals working in **manufacturing-oriented businesses**, particularly those looking to build foundational knowledge of carbon accounting and CBAM. Relevant functions may include:

- C-Suite Executives & Senior Management
- Heads of Operations & Production
- Heads of Supply Chain & Procurement
- Compliance & Regulatory Affairs Professionals
- Finance & Accounting Professionals
- Business Development & Export Managers

70 YEARS OF EXCELLENCE | AHK

Contents

Session 1 (Virtual, 3 hours)

Understanding Carbon Accounting at Organisation- and Product-Level

- Background:
  - Drivers of Industrial Decarbonisation
  - Regulatory Developments
- Understanding Carbon Accounting:
  - Key Concepts & Frameworks
  - Organisation- & Product-Level Methodologies
- Carbon Accounting in Practice (Step-by-Step Process)
- Case Study-Driven Exercise: *Calculating Product Carbon Footprint*

Session 2 (Virtual, 3 hours)

The Carbon Border Adjustment Mechanism (CBAM)

- Understanding CBAM:
  - Products in Scope & Applicability
  - Complex vs Simple Goods
- CBAM in Practice:
  - Monitoring, Reporting, & Verification (MRV) Basics
  - Navigating Business Partner Expectations
  - Preparing for Carbon Accounting & CBAM (Organisational set-up)
- Case Study-Driven Exercise: *Calculating Product Emissions for CBAM*

Self-Learning Component (2 hours)

Handout materials containing self-study materials and reference links/resources for further learning

An IGCC Certificate of Participation is given upon successful completion.

December 2026 – Dates:

- Virtual Session 1: **Thursday, 3 December 2026** | **10:30 - 13:30 IST**
- Virtual Session 2: **Friday, 4 December 2026** | **10:30 - 13:30 IST**
