

AHK INDIEN TRAINING

Carbon Accounting and CBAM: Intermediate Training

Preparing for the Carbon Border Adjustment Mechanism

Climate change poses a significant global threat, impacting human communities and the environment. As nations work to reduce greenhouse gas emissions, policies like the European Union's Carbon Border Adjustment Mechanism (CBAM) are reshaping how businesses measure and manage their carbon footprint, particularly in producing goods. Central to the efforts of companies to track their carbon footprint is the accurate quantification, monitoring, reporting, and verification of greenhouse gas (GHG) and carbon emissions.

Join the Indo-German Chamber of Commerce for a **Virtual Intermediate Training on Carbon Accounting and CBAM**. The 3-module training equips professionals to understand and navigate carbon accounting for their organisation and product-specific accounting in preparation for the Carbon Border Adjustment Mechanism.

The 3-module course combines German training and pedagogy standards with a curriculum adapted to the Indian business environment. Participants will gain an understanding of the fundamentals of carbon accounting in line with internationally recognised methodologies such as the GHG Protocol, and the key components of CBAM including its applicability and requirements for exporters to Europe. The training will provide practical insights into carbon accounting and approaches for implementation, empowering participants to align their companies' compliance with CBAM and international regulations.

Benefits

- ✓ Deepen your knowledge of carbon accounting methodologies in line with GHG Protocol standards,
- ✓ Align your organisation's compliance with the regulatory impacts of the Carbon Border Adjustment Mechanism (CBAM),
- ✓ Develop practical understanding and skills for quantifying and reporting GHG emissions, and
- ✓ Enhance your ability to implement effective carbon management strategies within your organisation.

Who should apply?

The training is open only to professionals working in manufacturing sectors and industries with production-oriented supply chains, including:

- Sustainability and ESG Professionals,
- C-Suite Executives,
- Heads of Compliance,
- Senior Compliance Officers,
- Heads of Supply Chain,
- Heads of Procurement,
- Heads of Purchasing,

Details

Duration	12 hours total (3 online sessions + 3 hours self-study)
Instruction Method	Interactive format with breakout group exercises
Certification	IGCC Certificate of Participation
Course Fee	IGCC Members: INR 20,000 (+18% GST) Non-Members: INR 25,000 (+18% GST)

Contents

Module 1 (Virtual, 3 hours)

Fundamentals of Carbon Accounting

- Carbon Accounting Fundamentals & Concepts,
- EU's CBAM and overview of global regulations on decarbonisation,
- Understanding Carbon Accounting:
 - Methodologies,
 - Scope 1, 2 and 3,
 - Data sources.
- Case study: Conducting an Organisational Carbon Footprint Analysis.

Module 2 (Virtual, 3 hours)

Product Level Carbon Footprint

- Key Consideration for Accurate Product Carbon Emission Calculation in Practice,
- Calculating Products Carbon Emission: Stepwise Procedure,
- Case study: Calculating Product-Level Carbon Emissions in line with International Standards.

Module 3 (Virtual, 3 hours)

Carbon Emission Calculation & CBAM in Practice

- Deep-Dive: Understanding EU's CBAM and Scope,
- Implications and opportunities for Indian exporters,
- Management Strategies and digital tool
- Case Study: Calculating Products Carbon Emissions in line with CBAM requirements

Self-Learning Component (3 hours)

- Handouts containing self-study materials,
- Reference links for further learning,
- Informative resources.

A certificate of participation is given upon successful completion.

2025 Batch – Dates:

- Virtual Session 1: **11 November 2025** | **10:30 - 13:30 IST**
- Virtual Session 2: **13 November 2025** | **10:30 - 13:30 IST**
- Virtual Session 3: **18 November 2025** | **10:30 - 13:30 IST**

Registration Period Ends: 28 October 2025
